

## TR 80 LCD Manual Hot Melt Cartridge Spray Applicator

**The TR 80 LCD works with adhesives supplied in 310 ml cartridges, including PUR hot melts.**

The electronic temperature control is integrated into the handle for easy operation. You can adjust the temperature from 100°C to 185°C to match the required specifications for the adhesive.

The spray nozzle and adaptor are screwed on to the cartridge, allowing for quick cartridge changes. Pre-warmed cartridges reduce downtime when reloading the handgun.

A manual handgun stand, with an air regulator for the glue and spray air is included. The spray air is internally heated in the handgun.

### Technical Data for TR 80 LCD

*NOTE: All specifications are adhesive dependent*

Voltage	115V, 400W
Air pressure for glue and spray air	20-100 psi
Air consumption at 100 psi	3.5 cfm
Temperature Control	Electronic
Overheat protection	Thermal
Heat-up time, approx.	3-10 minutes
Aluminum cartridge capacity	310 ml
Minimum application per sq. M	3 grams
Electrical cord length	4 meters
Weight of handgun	1400 grams

**Adhesive Application Specialists**
