

Adhesive Application Solutions

PT - 350 Industrial Hot Melt Stick Applicator

The PT-350 hand gun works with adhesives supplied in 11-11.5mm or 1/2" glue sticks.

The electronic temperature control is integrated into the gun for easy adjustment to match the required specifications for the adhesive.

The built in 300w heater helps melt the adhesive faster and combined with the ergonomic light weight design, it is easier for the operator to use than most conventional hand guns.

The gun comes equipped with a rigid steel foot allowing the gun to stand upright on a desk top rather than lying on it's side.

Technical Data for PT-350

Voltage 120 V, 300 W

Electronic Temperature control

Interchangeable nozzles

Weight of handgun = 540 grams

Adjustable trigger stroke for volume control

Temperature range = 284°F to 428°F
(140°C to 220°C)
