

PT - 412 Industrial Hot Melt stick Applicator

The PT-412 hand gun works with adhesives supplied in 11-11.5mm or 1/2" glue sticks.

The electronic temperature control is integrated into the top of the gun for easy adjustment to match the required specifications for the adhesive.

The built in 400w heater helps melt the adhesive faster and combined with the ergonomic light weight design, it is easier for the operator to use than most conventional hand guns.

As shown above a metal frame is also provided to allow the gun to stand upright on a desk top.

Technical Data for PT-412

Voltage 120 V, 400 W

Electronic Temperature control

Interchangeable nozzles

Weight of handgun = 900 grams

Adjustable trigger stroke for volume control

*Temperature range = 284°F to 428°F
(140°C to 220°C)*
